I TurboSeal

Waterproof concrete structures permanently TurboSeal

1. TurboSeal is a single component, highly elastomeric polymer rubber-gel type comprehensive waterproofing solution. You don't need to mix any chemicals to TurboSeal. TurboSeal itself is perfect to apply.
 2. TurboSeal is an eco-friendly product, composed of recycled rubber, used engine oil, modified asphalt, synthetic polymeric resin and special adhesives. It has less than 0.002% of VOCs. Safe for installation!
 3. TurboSeal is 45 times more cohesive than honey. The viscosity of TurboSeal is so remarkable that it never slips away after attached to the concrete and structure. It adheres well to any foreign materials, and it even adheres in damp conditions.
 4. TurboSeal doesn't need a curing time, because it never gets hardened! It remains in a flexible state forever, and it continuously reacts to the substrate movement. Even if the concrete gets cracks due to weather changes and substrate movements, TurboSeal will cover up for the cracks and never allows any single drop of water. Also, you don't need to waste days to wait for the curing time. Definitely cost effective!
 5. TurboSeal has an amazing self-healing ability! Due to its high viscosity, it sticks in one whole substance immediately after being cut.
 6. TurboSeal is a cold-applied waterproofing solution, which makes it safe to apply on the high rise buildings.
 7. TurboSeal is both for pre-applied and post applied waterproofing solutions.
 8. TurboSeal GT is a certified eco-friendly trowel applied membrane waterproofing product, suitable for all types of concrete structure: new and repairing, above and below grade!
- * You may need a pump machine to make TurboSeal soft before using.

Product Info	
Size	20kg /box
HS Code	3214.90
MOQ	48 ea
Price	FOB USD 55 / each
Features	A Waterproofing Agent
Material	Synthetic Rubber Polymer Gel

I Company Introduction

Company Name : Re-New System Co., Ltd

We were designated as a company that has a top 2013 KOREA's 10 Best New Technologies and now competing with leading large companies in the field. Now and forever, Renew System promises to do our best to protect and preserve the global environment, by fundamentally blocking any seepage in concrete structures under the motto of "Value the asset of citizens of the World."
