I Marksman MKP-054K

Battery-Operated Portable Dot peen marking machine

Ideal for large fabrications and bulky, heavy, and stationary parts on pallets, it supports linear, angular, and cylindrical surfaces and 2D Data Matrix marking.

Any material can be marked, from plastic and hardened steel up to Hardness Rockwell C (HRC) 62.

Can edit marking information with inbuilt keyboard or send it wirelessly to the marking head in seconds via Bluetooth and verify variable data and setting on the built-in liquid-crystal display (LCD).

Possible to do 40mins continuous marking without recharging by 2.0Ah battery standard.

Can create simple logo file on it directly without Auto CAD program. Possible to import excel file on it.

Editing available with PC or Mobile application.

- PC: JS-2100 PC software
- Mobile application: JS-2200 mobile application via Bluetooth

Product Info	
Size	145(W)*115(L)*320(H)(mm)
Dimension	158(W)*150(L)*340 or 155(H)(mm)
Material	Steel
Weight	4.7kg
Marking Area	64(X)*32(Y)(mm)
MOQ	1ea

I Company Introduction

Company Name : JEIL MTECH CO.,LTD.

JEIL MTECH has experience in custom designing marking systems to suit our customers' application. We have more than 60% market share in Korea and are now expanding our market overseas through our business partners in 17 countries all over the world. We aim to be the leader in the global market through our persistent research and development of new products.
