I Damian Lock (Smart Doorlock)

Damian Lock for your total secure solution.

- **Various password options** : It features a one-time passcode and periodic passcode options. Users can choose the appropriate option to manage short-term rentals, guest management, and unmanned properties.
- **Access History / Push notification** : Entrance activities are automatically recorded, and alarms are supplied, enabling you to manage real-time door activities.
- **Central control system** : Administrators have full control in inviting, managing, and deleting users, who can use the door lock without downloading the application. Multiple administrators can be registered.
- **Remote control system** : The door lock can be controlled remotely through the Z-wave hub and Wi-Fi bridge. You can remotely control unexpected visits from outsiders, change passwords, and manage users with the software.
- **Short/long-term user configurable** : Short-/long-term users can be set through guest invitation, which can be set by period, day, or time.
