

吉海日化实业有限公司

JIHAI CHEMICAL CO.,LTD

JHAI Introduction

Jihai Chemical Co.,Ltd established in 1994, formerly named sodium silicate plant, mainly product is sodium silicate, include solid & liquid sodium silicate. In the year 2003, our company renamed Jihai Chemical Co., Ltd. Our products mainly include laundry detergent raw materials and finished products. Laundry detergent raw materials, liquid sodium silicate, solid silicate, sodium sulphate-hydrogen peroxide-sodium chloride adduct (solid hydrogen peroxide, sodium persulphate); Finish product include laundry detergent paste, Laundry detergent, water treatment chemical products etc. Annual production capacity more than 20,000 tons. Our company covers an area of 6000 square meters, already become a comprehensive enterprise in chemical industry.

Now our new product sodium sulphate-hydrogen peroxide-sodium chloride adduct have been widely used in China domestic market, and already get good market reputation. We have already establish a long-term relations with many customers.

Our company adhering to "Providing excellent service to customers first" principle to service clients. Welcome customers to visit, and join hands with us in creating a better future!

JIHAI CHEMICAL CO.,LTD

NO.1

4Na₂SO₄ · 2H₂O₂ · NaCl
Manufacturer

Compound sodium sulphate(复合硫酸钠) JHSY2024-CSSA(产品代码 Product code)

1. Chemical name: Sodium sulfate-hydrogen peroxide-sodium chloride adduct, also known as solid hydrogen peroxide, sodium persulfate or adduct
2. Molecular formula: $4\text{Na}_2\text{SO}_4 \cdot 2\text{H}_2\text{O}_2 \cdot \text{NaCl}$
3. Molecular weight: 694.5
4. Content: Theoretical effective oxygen content 4.61%, the actual content in the product is about 4.5%.
5. Character: White crystalline granular powder
6. Property: Easy to dissolve in water, with a neutral PH value, mild oxidation performance, and environmentally friendly.

Functional characteristics

$4\text{Na}_2\text{SO}_4 \cdot 2\text{H}_2\text{O}_2 \cdot \text{NaCl}$ functions such as oxygenation, bleaching, sterilization, disinfection, stability, more convenient storage and transportation, mild oxidation performance, non-toxic.

Laundry

It is used as a bleaching agent and stain remover in laundry detergents powder, mild oxidation will not damage the clothes.

Fish farming

It is used as a disinfectant and oxygen source in fish farming industry to improve water quality and prevent diseases, usually people made it into oxygen tablet and then use in the pond.

Household cleaning

It can be used to clean and disinfect various surfaces in the household, including floors, walls, and kitchen appliances tea pot, tea cup etc.

Water treatment

It is used to treat water in swimming pools and hot tubs to remove algae and bacteria, it also can be used for sewage treatment.

Agriculture

It is used as a disinfectant and fungicide in agriculture to control plant diseases.
