

Inways 1.8m UV Hybrid Printer with Convey Belt

A good choice for leather, home decoration and advertising

CMYK mode or CMYK + W mode is available

GENERAL INFORMATION

More Applications

Equipped with 4 to 9 heads to print White, KCMY for applications in more industries, which ensures cost-effective investment.

Environmentally Friendly

With the cooling LED UV Curing Technology, the machine doesn't produce ozone during printing. Moreover, the LED UV lamp has a long life time and consumes less energy.

The machine uses the ink without VOC in it so that it is environmentally friendly during the whole printing process.

High Quality

The industrial print head with a minimum ink droplet size of 7PL/5PL ensures high printing quality. The machine uses the components processed by moulds and CNC to ensure the mechanical accuracy, which in turn ensures the high output quality.

Ten years of experience in the electrical system, ink system, transmission and machine designing helps us ensure the stability of the machine.

TECHNICAL PARAMETERS

Model		YJ1800-UV	
Print head	Print Head	Industrial Piezoelectric Print head	
	Head QTY	4~9 pcs	
Ink	Ink colors	White, K C M Y	
	Ink Type	UV Ink	
	Ink Supply	By Negative Pressure System	
Speed (2 rows of CMYK)	Print Head	Ricoh Gen5 head	Ricoh Gen6 head
	Draft Mode	33 m ² /h	43 m ² /h
	Quality Mode	22 m ² /h	28 m ² /h
	Photo-Realistic Mode	16 m ² /h	21 m ² /h
Medias	Media Width	1800mm	
	Media type	PET, transparent film, leather, one-way vision, self-adhesive vinyl, canvas and so on	
	Media Transmission	Convey belt	
Print head cleaning		Manually purging device	
Interface		USB	
Working Environment		Recommended Temperature: 18~29°C, Humidity: 50% to 80%	
Power Supply		Rated Frequency 50Hz	
		Rated Voltage: AC220V(±10%)	
Machine Dimension		L3015 x W930 x H1350mm	
Machine Weight		590KG	

The parameters above are subject to change without prior notice
