BF-CM625s

Push-to-talk over Cellular

Highlights

Fast Communications with 4G Networks

4G networks give BF-CM625s a higher data transfer rate and reduced latency, and thus enable the user to communicate with unprecedented speed and efficiency.

Diverse Network Coverage: LTE, GSM, WCDMA, Wi-Fi

BelFone PoC radio BF-CM625s works over GSM, WCDMA and Wi-Fi networks, giving you the most dynamic options for your PTT communications.

Talker Priority (Supervisory Override)

A radio with higher level can interrupt communications between radios with lower levels, giving higher priority to senior workers.

Dispatch Application

BelFone BF-CM625s comes with an optional dispatch application that allows managers to track every worker's location in real-time and can monitor and dispatch with ease.

Real-time Radio Status

This function allows the user to know whether another user is available or not with the real-time presence indicator--green for "Available" to talk while red for "Do Not Disturb" (DND).

Over-the-air Programming

The user's PTT contact book is preset via over-the-air programming, which makes management easier. And users can better concentrate on the mission.

Features

- PTT Over 4G LTE Networks
- Over-the-air Programming
- Versatile Calling Functions: Individual, Group, All Call
- Talker Priority (Supervisory Override)
- GPS/Big Dipper (China)
- High Quality, Clear Audio
