1 Glazing Powder

2 Melamine Moulding Compound

3 Melamine

4 Melamine Foam

# Glazing Powder

## Specification

Type	Molding temperature	Fluidity	Volatile substance
LG110	18"(temperature 155°C)	≥195	≤4%
LG220	30"(temperature 155°C)	≥200	≤4%
LG250	35"(temperature 155°C)	≥210	≤4%

## Packing and storage

Packed in kraft bag (10kg,20kg,25kg per bag)

Store in cool and dry places

# Melamine Moulding Compound

■ Color: 

## ■ Application

It is used to produce dinnerware , electrical items ,ect

## ■ Feature

Molded parts have excellent resistance to abrasion, boiling water, detergents, weak acids and weak alkalis as well as acidic foods and extracts.

## ■ Packing and storage

Packed in kraft bag (10kg, 20kg per bag)

Store in cool and dry places.

# Melamine

## Specification

Test Item	Specification	Result
Purity, wt.%	$\geq 99.8$	99.93
Moisture, wt.%	$\leq 0.01$	0.003
Ash, wt.%	$\leq 0.03$	0.01
kaolin turbidity, degree	$\leq 20$	10
PH	7.5-9.5	8.5
Particle Size	$\geq 280$	300

## Packing and storage

Packed in woven bag (25kg, 500kg, 1000kg per bag )

Store in cool and ventilated places away from fire and heat sources

# Melamine Foam

## Specification

Item	Specification
Density (kg/cbm)	8.5
Size (cm)	250*70*25
Hot strength kpa	100
Tearing strength N/cm	24
Elongation%	20
Color	white ,pink and grey
Application	cleaning ,soundproof and fireproof
