I DayoungENC Face Mask

DayoungENC Clean air Clean Air Class 1 Dust Mask 1001

- Anti-dust mask

It consists of a face and a head strap. The filter ensures that the user inhales clean air that's free of dust, mist, fumes, and heavy metals. Air exhaled from the body easily flows through the filter.

- The anti-dust mask has a safety grade that blocks 99% or more harmful substances (carcinogens such as sodium chloride and paraffin oil). The grade 1 mask blocks 97% or more, while the class 2 mask blocks 80% or more.

- Using dust mask

It is possible to prevent infectious diseases (pneumonia, lung cancer, asthma, rhinitis, bronchitis, etc.) caused by the infiltration of harmful substances by particulate matter at specific sites, such as construction sites, welding sites, livestock breeding sites, and various manufacturing sites (tobacco, fiber, cement, brick, wood, ceramics, and glass).
