I PROSAVE AIR RELEASE VALVE AND VACUUM VALVE

Reduce risk and make your life more Safer and Better.

KSBJ

Air Release & Vacuum Breaker Valve:

Also called small office valves, are designed to automatically release small pockets of accumulated air from a pipeline while the system operates under pressure exceeding atmospheric pressure

Benefits:

Pressure & Vacuum relief function, Anti-Surge & Anti-Shocks. Maintenance free Surge and water hammer protection, Liquid overflow protection. Less system energy, Provides high capacity venting for pipeline protection, Increasing pump efficiency

CAV-D

Combination Air Release & Vacuum Breaker Valve:

Additional Option for a variety of applications

Benefits:

Pressure and vacuum relief, Anti-surge and anti-shocks, Surge and water hammer protection, Provides high capacity venting, Increased efficiency, Less energy, Release small pockets under operation pressure

KSVB

Vacuum Breaker Valve:

Designed, manufactured and tested according to the API code

Benefits:

Protect equipments against over vacuum, Prevent air intake during normal operation, Evaporative losses of product, To help containing odorous and potentially explosive

I Company Introduction

Company Name : PROSAVE CO., LTD

PROSAVE has been trying to produce the best quality products with own special technology. We supply high quality safety valve with state of the art technology from our modern manufacturing facilities. To be the No.1 company in the world where all of our employees and their families are happy and their dreams can come true.
