01

3in1 Hydro Exfoliator

[3in1 Hydro Exfoliator] Information – Ingredients

Main Ingredient

AHA

Glycolic Acid, Tartaric Acid, Malic Acid

Removal the dead skin cell and pollutant, and improve skin barrier
AHA has the skin's humidity ability and dull skin by high PH leads to be soft. Soft skin has more ability of water-holding and well adjust at follow-up product.

BHA

Salicylic Acid

Control the pores sebum and strong anti-inflammation.
As it controls the pores condition, so it normally well use for pores care content.
It has anti-bacterial function order to control the remaining bacteria.

NMF

Urea, Sodium Lactate, Sodium Hyaluronate, Ceramide NP

NMF is the moisturizing factor processed once a person is born. It is restoring the original moisturizing factor that has been broken.

Extract

Allantoin, Portulaca Oleracea Extract

Allantoin helps skin differentiation due to stimulate cell restoration. Also, it protects sensitive skin from irritation and antigen. It works as anti-inflammatory.
Portulaca Oleracea Extract is calming the skin reaction from allergy and irritation. It also protects sensitive skin by anti-bacterial and ant-inflammatory.

3in1 Hydro Exfoliator

The solutions available until after HydroPeel procedure

Satisfaction is reduced if homecare is not done well even though the procedure is good

Homecare is as important as procedure

The case of homecare is not done well

"It was ok only one or two days after I get HydroPeel, and I have skin trouble again... Such a waste money "

Even if the effect was good right after procedure, the skin condition will be worse again in a day or two day in case of sensitive skin. This is the key point of decreasing satisfaction of procedure if proper homecare is not followed.

In case homecare is well managed

"Certainly, there is an effect. Now, let's get more treatment? "

The skin trouble care should be followed proper homecare rather than other kinds of care. If it is proven to be effective as it was complicated and difficult skin care, you can get reliability from clients, and expect 2nd demand of from them.

The solutions available until after HydroPeel procedure

Perfect homecare that enhance treatment efficacy

Toner for trouble skin

The most ideal skin PH value is 5.5

PH 5.5 retained by NMF(Natural Moisturizing Factor) and Sebum is protected skin from bacteria and keep skin moisturizing in order to keep healthy skin condition.

Crumbling skin barrier

From harmful environment and high PH value of cleansing products, the skin loses natural skin protector. And the ideal PH value goes to higher value, so it leads low immunization of skin itself.

The key point for healthy skin is "Balance"

For retuning to normalization of skin immunization, retaining of skin moisture balance and PH value are important. For this, using right range of acidity and wiping toner with NMF are important.

03

3in1 Hydro Exfoliator

The solutions available until after HydroPeel procedure

Crumbly skin

Dead skin

Poor make-up condition

Unabsorbed basic cosmetics

Getting dry skin

Increasing skin heat

Double care with premium grade of AHA and NMF

AHA is cleaning the skin surface such as removal dead skin cell and rising the ability to hold moisture on skin.

According to **NMF** effect, it is rising the holding moisture ability of AHA, control the skin temperature, and relaxing the skin condition.

03

3in1 Hydro Exfoliator

The solutions available until after HydroPeel procedure

Skin trouble

Frequently comes up tiny trouble

Inflection when sleepless

Well balance of PH value and skin respiration are the key point

Acne bacillus brings skin troubles as it is anaerobic. To prevent bacterial growth, the oxygen inflow should be smoothly for suitable skin respiration. Moreover, ideal PH value has sterilizing effect on skin, so recovery to regular acidity is required. AHA and BHA of 3in1 Hydro Exfoliator remove the dead skin and control the pores for helping skin respiration and PH value balance to get result of increasing the skin immunity.
